1. Jacob Patel – Senior Marketing Specialist

Tool Requested: *AdHubb*
Use Case: Advanced campaign performance tracking across social media and digital ads.
Business Justification:

> "We need more granular conversion data for our ad campaigns—AdHubb gives us that. HubIQ's analytics aren't built for multi-channel analysis, and we're missing opportunities."

Vendor Docs Received:

- SOC 2 Type II — dated 13 months ago
- No penetration test
- InfoSec policy — dated 2 years ago
- No data retention policy
- No SSO integration mentioned

---

2. Elisa Nguyen – Director of Learning & Development

Tool Requested: *SkillSpring (LMS)*
Use Case: Personalized onboarding/training paths for remote employees.
Business Justification:

> "Our current internal training site is too static. SkillSpring lets us personalize learning paths, track completion, and scale training globally."

Vendor Docs Received:

- SOC 2 Type II — unqualified, but had 1 finding related to terminated users retaining access
- Pen test — included, but has 2 critical findings listed as 'under review'
- InfoSec policy — up to date
- Data retention: client data stored for 3 years after contract ends
- Okta SSO supported

---

3. Khalid Owens – Software Engineering Manager

Tool Requested: *CodeZen*
Use Case: Code repository with integrated CI/CD pipeline to streamline workflows.
Business Justification:

> “CodeZen has built-in CI/CD pipelines that are more efficient and saves us time. We can reduce third-party integrations by consolidating build tools.”

Vendor Docs Received:

- SOC 2 Type II — unqualified, no findings
- Pen test not shared (only a summary was uploaded)
- InfoSec policy — current
- Data deletion: within 90 days of request
- No SSO support (vendor claims it's "on the roadmap")

---

4. Danielle Romero – Senior Accountant

Tool Requested: *Ledgerly*
Use Case: Automates financial reporting and audit trail generation.
Business Justification:

> “Ledgerly can automate a lot of the manual report creation we’re doing and makes month-end close much easier.”

Vendor Docs Received:

- No SOC 2 report provided
- Pen test — dated 18 months ago with 2 critical findings, no remediation updates
- InfoSec policy — includes encryption and access controls
- Data retention: 30 days after contract ends
- SSO supported (including Okta)

---

5. Tessa Grant – Creative Director

Tool Requested: *Designify*
Use Case: Creative collaboration tool for managing visual assets and syncing with marketing campaigns.
Business Justification:

> “Designify has a better interface for client feedback and allows us to create brand kits that sync directly with marketing campaigns.”

Vendor Docs Received:

- SOC 2 Type II — unqualified, but includes 2 findings:
    - HR failed to remove access for 2 terminated employees

    - Employee handbooks unsigned by 4 new hires
- Pen test — includes 2 medium and 1 critical finding
- InfoSec policy — present
- Data retention: data deleted upon account deletion
- No SSO, but MFA is enforced
